IMPROVING ANIMAL GENETIC POTENTIAL

Our employees Arman Ohanyan, Narek Tadevosyan and student of the Ag. University, Arsen Arsenyan, who was enrolled as an intern at CARD, participated at the Animal Nutrition Symposium on sows feeding and care, organized by “Topigs Norsvin Hellas” company in Athens.

The event aimed at the introduction of specific animal feeding issues in relation to the genetic material and genetic programs, offered by Topigs, for the purpose of pig production efficiency increase through the optimized diet.

They also participated at an impressive presentation of the new TN70 – the sow of the 21st century, developed by the company professionals. TN70 produces large litters of strong, uniform piglets that excel in fast, feed efficient growth and carcass quality.

Close cooperation of our staff with the Topigs company professionals promotes the provision of improved genetic material tailored to the needs of the Armenian market.

CONTINUED COOPERATION WITH “AUSTRIAN GENETICS”

At the invitation of CARD foundation, “Austrian Genetic” company’s director Mr. Peter Kreuzhuber and Head of the Associations of Austrian Cattle Breeders and Veterinarians (ZAR), Mr. Martin Stegelberg visited Armenia to familiarize with the stockbreeding, ed-

ucational and scientific situation in the Republic of Armenia, as well as the quality characteristics of the generation of animals, received from the Austrian Flegvi breed. Five days spent in Armenia included several training sessions, productive meetings and site-visits.

Visits were paid to the Ministry of Agriculture and Agrarian University to discuss the prospects of the stockbreeding and veterinary sectors development in the country, as well as the educational level increase.

A training course was organized for the farmers, students, veterinary and animal breeding associations on Cattle breeding in Austria and Genetic potential of the Austrian Flegvi breed animals.

They introduced the idea of specialized agricultural schools, providing theoretical and practical knowledge to future agricultural specialists and discussed the opportunities for establishing this model in Armenia as well.

The guests visited farms, where both imported and locally reproduced animals (through semen, received from Austrian genetics) were bred. Recommendations were provided to the farmers on the proper animal care and holding.

HIGH QUALITY RELIABLE PARTNERS

Recently CARD representatives had an opportunity to join the Trade Mission of NL companies to Georgia, organized around the Regional Agro Expo, held in Tbilisi, Georgia. The Expo provides a unique platform to showcase products and services and network with targeted groups and high ranking agriculture officials, food industry professionals and buyers to identify and explore business and investment opportunities in Georgia and across the Caucasian region.

The trade mission of Dutch companies provides an opportunity to showcase Dutch businesses, knowledge institutions and organisations and put them in direct contact with local parties.

Within the frames of the mission our company members had a chance to meet with potential business partners, get a better idea of the market opportunities, exchange knowledge and practice, and grow the international market.

The motto of the event, “High quality, Reliable partners”, talks to itself, connecting partners throughout the world.
