YOUNG GENERATION IS OUR FUTURE

Over the years our company has been guided by the belief that the growth and sustainability of our company and the agricultural sector of the country is secured through the development of young generation and preparation of proper professionals for the country.

We often acknowledge the fact that the majority of our company experts have started their career at CARD as interns, gaining knowledge and experience from the United States Department of Agriculture Marketing Assistance project Armenian office representatives. And now they are high in demand in the whole region as qualified and competent professionals.

Greenhouse and Horticulture Development Department has trained more than thirty students in the course of its operation, and some of them continue to work in our company, while the others occupy different positions in the leading companies of the sector.

Yervand Marikyan and Artyush Karapetyan started their career path at CARD. Just after graduating from the Agrarian University, they got a chance to apply the gained knowledge in practice and develop a number of practical skills. Being capable and diligent, they both achieved excellent results in a very short time. Seeing their commitment and willingness to learn and develop, CARD has provided them with training opportunities abroad, particularly in Ukraine, Russia, and China.

Highly estimating the potential of the young people, as well as their readiness to transfer the knowledge to the farmers along with the provision of high-level agricultural services, CARD decided to transfer the management of the Farm Service Center, established through the direct support of the United States Agency for International Development in the Norapat community of Armavir region, to the limited liability company, founded by Yervand and Artyush. We are sure that the young people will transmit a new breath to the services, provided by the center.

Besides undertaking the role of the young generation training and professional development, our company serves as a platform for establishing their own business in rural communities and providing services to the farmers. The example of these two boys is a vivid proof that diligence and aspiration design the path to serious success and we are ready to continue guiding young people and revealing their potential.
