

Report on Visit to Germany

By Arman Ohanyan, CARD, 1 June 2006

Starting 2006, CARD is an exporter of bovine semen from the USA, a distributor of WWS LLC in Armenia - the first in Trans Caucasus. From the period of May 30 to June 5, F. Vardanyan, the Head of Rural Development Department and A. Ohanyan, a dairy specialist, participated in the conference on the topic "WWS 35 years-old distributing collaboration", as well as in the All-European Championship, 2006 for Holstein, Red Holstein milch cows.

Representatives of more than 40 countries from all over the world participated in the conference (WWS is collaborating with 77 countries, the number of which increases every year). The background history, the current situation and the achievements were presented in two days time.

The most interesting in the competition was that we received information concerning genetic abilities of high breed milch cows.

The information and the informative materials, acquired during the business trip are currently being distributed to the milk producing farmers, specialists, as well as are used by us for the implementation of CARD activities.
